PROFESSIONAL SUMMARY

UX/UI designer with a non-traditional path into tech, built through immersive, project-based programs instead of a design degree. I work through the design thinking process, empathizing with users through research, defining the real problem, then prototyping and testing before calling anything final. I bring AI tools like Claude into that process for research, ideation, and feedback. I care as much about the process as the outcome.

CERTIFICATIONS

- Google UX Design - 2025
- Anthropic - AI Fluency Framework & Foundations
- Anthropic - Claude 101
- Apple Teacher - 2025
- Apple Developer Academy | MSU Renaissance Program - 2025
- Apple Developer Academy | MSU - 2024

EDUCATION

Henry Ford College
Liberal Arts
2022

SKILLS

- UX/UI Design
- Figma
- Sketch
- AI Fluency
- Adobe Illustrator
- Photoshop
- Graphic Design
- Information Architecture
- Accessibility
- Copywriting
- Collaboration
- Style Guides
- Journey Mapping

PROJECTS

SCROLL SPIKE

IOS APP - UX/UI DESIGNER & RESEARCHER

- Synthesized research across 4 health domains into a persona-driven, heart rate based doomscrolling tracker, then validated the concept through user testing before finalizing the high fidelity Figma design.

SKILLS: User Research, Persona Development, Wire-framing, Usability Testing, Prototyping, Figma, Brand/Visual Identity

WHAT IS THAT?

IOS APP - UX/UI DESIGNER

- Designed a slang-translation app that turns learning Gen Z vocabulary into a collectible badge system for older generations, using AI tools to help draft the persona and generate definition content.

SKILLS: Persona Development, Content Design, Iconography, Gamification, Sketch, AI-Assisted Research

EXPERIENCE

UX/UI DESIGN MENTOR

APPLE DEVELOPER ACADEMY | MSU

July 2025 - Current

- Served as a DRI, Directly Responsible Individual, owning a 5-week challenge cycle, overseeing content sequencing, stakeholder communication, guest speaker logistics, and delegation across a 17-person team supporting 200 learners.
- Conceptualized and delivered user research and usability testing practices, helping translate insights into design decisions within the Challenge Based Learning framework.
- Collaborated on a 4-person design team to enhance recruitment practices, contributing user personas, user stories, a low-fidelity prototype, and market research.
- Analyzed prior curriculum roadmaps across 4 cohort years to restructure challenge sequencing, adjust scope, and recalibrate delivery timelines.
- Moderated and screened 100+ candidates for next year's incoming cohort as part of the program's admissions process.

CONTENT PRODUCER

BREWLIGANS PUBLIC HOUSE

October 2024 - January 2026

- Designed a cohesive brand identity and visual content system aligned with the Brewligan's atmosphere, applying consistent style choices across all content.
- Used performance analytics to inform iterative content decisions, growing post views by +2.3M, profile views by +7,675, and followers by +2.5K.
- Managed content calendars and cross-functional coordination, balancing creative execution with data-driven strategy adjustments.

UX/UI DESIGN INSTRUCTOR

HENRY FORD COLLEGE

April 2025 - June 2025

- Designed and delivered an 80-hour curriculum covering the end-to-end UX process - research, wire-framing, prototyping, and basic coding - for students building original app concepts.
- Guided students through iterative design and feedback, helping them refine user flows and interface decisions.
- Tracked individual progress, attendance, and grading while partnering with fellow instructors to plan lessons and distribute workload.

UX DESIGNER/RESEARCHER

SALES QUBE - CONTRACT

July 2024 - January 2025

- Partnered directly with the founding team to shape product vision for a sales-training app, leveraging emerging AI tools to accelerate research and concept exploration.
- Translated concepts into user flows and wire-frames, then built a full high-fidelity interface in Figma using Apple's Human Interface Guidelines to ensure accessibility.
- Built a scalable design system from scratch so new screens could be assembled consistently.
- Led competitive analysis to validate market opportunity and inform product direction before design work began.
